Perceptics Announces Higher Performing and Greater Accuracy License Plate Reader Systems for the Access Control Marketplace.

Two New cost-efficient LPR/ANPR Systems are available to security access control markets with Best-In-Class Accuracy Performance.

KNOXVILLE, Tenn. – [Perceptics](#), LLC, the United States' leading provider of National Border Security imaging systems announced today the availability of [two new automated License Plate Reader \(LPR or ANPR\) solutions](#) for the Security Access Control market. For more than 30-years, Perceptics has been known as the principal provider of the world's most accurate LPR technologies along the U.S. and Canadian and U.S. Mexican borders. Engineered for the challenging operations of mission critical infrastructures, these next generation systems includes the first [color License Plate Reader System and an infrared License Plate Reader System](#), both with "best in class" read accuracies.

[The Color LPR System](#) is considered a high performance solution at an affordable price. This LPR solution captures State or Province identification as part of the license plate data on all plate types at an impressive accuracy level. [The Infrared LPR System](#) boasts a compact footprint with fast installation and integration capabilities with other security technology solutions.

"For our customers, it's all about qualifying and controlling traffic at their facilities while assessing security risks in a productive and cost-effective manner," says Adam Nelson, Director of Sales and Marketing. Nelson continues, "These new LPR systems give gate personnel the real time data they need to quickly make security decisions."

[Perceptics License Plate Readers](#), Driver Imaging Systems and [Under Vehicle Inspection Systems](#) are deployed in more than 1,500 vehicle lanes worldwide, including the United States, Canada, United Arab Emirates, Saudi Arabia, Malaysia, and Singapore.
