**Perceptics and Integrys join forces to develop Canadian market
for security, surveillance and traffic management technology**

*They will build on track record with U.S. Department of Homeland Security and
Canada Border Services Agency*

TORONTO, Ont., and **KNOXVILLE**, Tenn. – [Perceptics](#), LLC, the United States' leading border security and traffic management company, and Toronto-based [Integrys](#) announced today that they have joined forces to develop the Canadian market for the same type of imaging technology solutions Perceptics has provided for the Canadian government, U.S. Department of Homeland Security and other customers around the world..

Under the value-added reseller agreement between the two companies, Integrys will deploy its sales and marketing organization and provide installation, adaptations, servicing and training for a wide range of Perceptics solutions for mission-critical security and revenue-protection applications. Perceptics' featured products for the Canadian market include its License Plate Reader (LPR) and Under Vehicle Inspection Systems.

Perceptics since 2007 has been providing the Canada Border Services Agency with technology upgrades and new systems for inbound traffic lanes for its Integrated Primary Inspection Line Highway License Plate Reader Program. This contract and partnership with the CBSA and Canada Revenue Agency provide Canadian Customs officers with LPR systems that allow real-time queries to databases containing important and necessary information to secure Canada's borders.

[Perceptics](#) also provides systems for the U.S. Customs and Border Protection, as a subcontractor to Unisys Corp. along the [borders with Canada and Mexico](#).

"We joined in this partnership with Perceptics because we see great potential in Canada because of Perceptics' lead position in some of the technology they offer, such as border security systems and under vehicle inspection," said Integrys President Brian Flippance.

"In addition to our border security applications, we looking forward to working with Integrys to offer our imaging technology to other Canadian agencies, nuclear power plants, military bases, airports, banks, embassies and other sites," said Perceptics President John Dalton.

[Perceptics License Plate Readers](#), Driver Surveillance Systems and [Under Vehicle Inspection Systems](#) are deployed in more than 1,000 vehicle lanes worldwide, including the United States, Canada, United Arab Emirates, and Singapore. In 2009 [Perceptics](#) released a

Color Arabic LPR for the Middle East which is able to interpret a plate's color to determine a vehicle's origin.

[IntegrYS](#) is the trusted source of embedded computing, imaging technology, engineering know-how and local support for aerospace, defense, healthcare, manufacturing, public safety, telecom and transportation. Over 50 years of experience gives IntegrYS the strategic insight and technical savvy to help you succeed.
