**Perceptics and Moro-Security team up to expand upon Mexico's growing facility security technologies market**

*Building upon an established border security track record, Perceptics teams-up with Moro-Security to meet Mexico's growing facility security market.*

**Mexico City**, Mexico, and **KNOXVILLE**, Tenn. – [Perceptics](#), LLC, the United States' leading border security and traffic management company, and Mexico City-based [Moro-Security](#) announced today that they have joined forces to expand upon Mexico's facility security market segment using the same type of imaging technology solutions Perceptics has provided for the Canadian government, U.S. Department of Homeland Security and other customers around the world.

Under the value-added reseller (VAR) agreement between the two companies, [Moro-Security](#) will deploy its sales and marketing organization and provide installation, adaptations, servicing and training for a wide range of [Perceptics](#) solutions for mission-critical facility security applications. Perceptics' featured products for the facility security market include its [License Plate Reader](#) (LPR) and [Under Vehicle Inspection Systems \(UVIS\)](#).

For more than 30-years, Perceptics has developed and provided the most accurate security imaging technology systems and solutions to the U.S. Customs, Canadian Border Services and Mexico Boarder Control Agencies. Perceptics' [License Plate Reader](#) systems are accurately interpret license plates at these borders at an unprecedented 95% level and are the only systems that read state, providence or country of origin.

"Adding Perceptics [License Plate Readers](#) and [Under Vehicle Inspection Systems](#) to our existing security product portfolio, will allow us to meet the growing need for highly accurate and fast facility security systems," said Moro-Security's President, Roberto Carlos Peña.

"[Moro-Security](#) has an impressive 20-year career providing high tech facility security solutions and we look forward to working with them as we identify new opportunities for accurate vehicle identification and inspection systems," said Perceptics President John Dalton.

[Perceptics License Plate Readers](#), Driver Surveillance Systems and [Under Vehicle Inspection Systems](#) are deployed in more than 1,000 vehicle lanes worldwide, including the United States, Canada, United Arab Emirates, and Singapore. In 2009 [Perceptics](#) released a Color Arabic LPR for the Middle East which is able to interpret a plate's color to determine a vehicle's origin.

[Moro-Security](#) has almost 20-years of experience in preventive maintenance, predictive and corrective maintenance of various high-tech security electronic devices. As part of their services portfolio, [Moro-Security](#) offers consulting and training, logistics and installation, maintenance and sales and income security equipment.
