**1 System**  
**13 Years of Operation**  
**26 Million Cars**  
**0 Downtime\***

\* unscheduled

## Picture perfect accuracy delivers every time.

Perceptics has been the sole provider of LPR technology for North American borders for 25 years. We provide, install and maintain all of the license plate reader systems currently in operation at land border crossings in the United States and Canada. Our success is the result of ongoing development of patented technology that provides ease of use, proven reliability and accuracy. Imagine an LPR that automatically reads license plates 24 hours a day, seven days a week, with no interruption for 13 years.

NATIONAL BORDER SECURITY

HIGHWAY SPEED TOLL COLLECTION

### Features of the Perceptics ANPR/LPR:

- Real-time capture of license plate
- Distinguishes countries, states and provinces
- Captures retroreflective and non-retroreflective plates
