

FOR IMMEDIATE RELEASE – October 19, 2010

**PERCEPTICS, LLC CONFIRMS SIGNIFICANT STRATEGIC
INVESTMENT IN PLATESCAN**

Knoxville, TN. and Newport Beach, CA. – [Perceptics](#), LLC, a major provider of border enforcement services to the US Customs and Border Protection (CBP), the Canada Border Services Agency, as well as border management agencies and critical infrastructure facilities throughout the world, announces a significant investment in [PlateScan](#), LLC, a leader in mobile automatic license plate recognition technology. The strategic alliance enhances the [Perceptics](#)' product offerings to both new and existing markets and advances international selling opportunities for [PlateScan](#) technologies in Latin America and the Middle East.

"We believe PlateScan's technology will enhance our ability to help secure national borders with CBP and others, and we will benefit from the investment by expanding the capability of its leading edge license plate recognition technology to law enforcement and the private sector throughout the U.S., Latin America and Middle East," said Perceptics' CEO, John Dalton.

[PlateScan](#) is aggressively expanding to all U.S. states, districts and territories, as well as to other agencies throughout the world, and will leverage [Perceptics](#)' global reseller and integrator base. "We do not see any part of the world where our neural network-based system can't outperform what is already available," said Mark Kelly, CEO and CTO of PlateScan.

The two companies remain as independent entities, but will cooperate in opportunities where the combination of their technologies will better meet the client agency's needs. In addition, important elements of existing technology will be incorporated into one another's offerings to enhance overall license plate reading capabilities.

###

About PlateScan:

PlateScan, LLC is a rapidly growing, privately held, Newport Beach, CA-based company with offices in New York, North Carolina and the United Kingdom. It offers easy-to-use, yet highly sophisticated mobile and fixed position neural network-based license plate recognition technology and data analysis software.

About Perceptics:
