Perceptics, LLC and Simtix form strategic partnership for border security systems in the Middle East and Northern Africa, beginning with ongoing work in Abu Dhabi

DUBAI, United Arab Emirates – Perceptics LLC, the world’s leading national Border Security and Traffic Management company, has formed an exclusive partnership with Dubai-based Simtix for distribution of Perceptics’ advanced under vehicle inspection systems (UVIS) and license plate reader systems (LPR) in the Middle East and Northern Africa.

Projects under way include a border security solution being provided for Abu Dhabi, UAE, in which Perceptics, as a subcontractor to American Science and Engineering, Inc. (NASDAQ: ASEI) (AS&E®) is integrating its UVIS and Arabic LPR imaging technology with AS&E’s Backscatter x-ray detection solutions at strategic border check points. AS&E’s solutions include its OmniView™ Gantry cargo and vehicle inspection system and AS&E’s multi-view Z Portal® cargo & vehicle screening system.

This technology enhances the ability of the Abu Dhabi Customs to protect the emirate’s borders while facilitating trade and collecting revenues through effective customs operations as per the directorate strategic priorities.

“Simtix is pleased to be the exclusive Master Distributor of UVIS and LPR systems for Perceptics in the Middle East and North Africa region,” said Simtix Vice President-Business Development Eric Chapman. “After significant investment in the relationship by both parties, we are excited to see important projects underway.”

The border security solution for Abu Dhabi and the partnership with Simtix continues Perceptics’ global expansion as the leader in providing this increasingly important technology.
