

IMAGE OPTIMIZATION SERVICES

Some characters in the images are obscured to prevent the release of personally identifiable information.

Reduce operating costs by optimizing the performance of your LPR and OCR systems.

The performance of any license plate reader system relies on the quality of the images and the accuracy of the OCR engine. When low quality images are run through even the most sophisticated OCR engine, error rates increase and accuracy rates decline. Perceptics' Image Optimization Services help to ensure that your LPR systems generate optimal image capture and OCR performance, and are tailored to meet the specific needs of any tolling project. With the support of Perceptics' imaging experts, we can provide you with the resources needed to get the best possible performance from your system.

AVAILABLE SERVICES:

- › Camera performance audit
- › On-site camera adjustments
- › Pre-installation engineering support
- › Consultation with a Perceptics imaging expert during installation
